

Piaggio P-180 Avanti

Turboprop aircraft with jet-like performance.

The Piaggio P-180 has a very recognizable design, but that's not its only standout feature.

This aircraft combines the performance of a jet with the flexibility of a turboprop, allowing landings on shorter runways.

Its rear-facing engines not only ensure a quieter cabin but also provide additional interior space. In fact, it's the only aircraft in its class with a genuine stand-up cabin.

With a range of 7,400 km, the P-180 is an ideal choice for chartering swift trips across Europe, whether it's for business meetings or weekend getaways with the family. Plus, you can carry up to 100 kg of luggage.

7 Passengers

2 Pilots, 1 Cabin Crew

Year of Manufacture 2015

Range: 7.410 km / 4.002 nm
